

Church Hill School Computing Curriculum Impact Statement

As a result of our Computing curriculum our pupils:

- Have the confidence to use a wide range of technology appropriately.
- Children have the courage and confidence to ask questions when a task seems challenging.
- Use new subject-specific Computing vocabulary appropriately in their explanations and work.
- Feel valued by their peers and school staff and believe that they can achieve and succeed in Computing.
- Have had meaningful, conversations about Computing which support their use of technology in the real world.
- Have an understanding of how technology has changed over time and talk with confidence about technology in the past and present.
- To have inquisitive minds, to take risks to challenge themselves both independently and working with others.
- Leave primary education being secondary ready, equipped with secure technological knowledge.
